COMSAR.1/Circ.50/Rev.3  
13 January 2012

**DISTRESS PRIORITY COMMUNICATIONS FOR RCCs  
FROM SHORE-TO-SHIP VIA INMARSAT**

1 The Secretariat in consultation with Inmarsat, has updated the information on Rescue Coordination Centres (RCCs) associated with Inmarsat Land Earth Stations (LESs).

2 Some RCCs have established arrangements whereby they are able to use the distress priority when sending certain messages from shore-to-ship via the Inmarsat network. The method of achieving this varies depending on the nature of the facilities available at both an LES and an RCC. Inmarsat believes that such arrangements can contribute significantly to the efficiency and effectiveness of search and rescue operations.

3 In order for an RCC to make use of the distress priority in the shore-to-ship direction, it is necessary for that RCC to establish a prior arrangement with the LES to set up the necessary traffic routing arrangements. To enable this arrangement to be made, the RCC should contact the LES via the Operations Coordinator for that LES, whose details are contained in COMSAR.1/Circ.53/Rev.1 or a later revision of that circular. The LES will advise the RCC on the specific procedures to be used to make use of the distress priority in the shore-to-ship direction via that LES. To provide for priority access to the relevant LES an RCC may make arrangements such as:

- .1 two-stage voice dialling; or
- .2 installing a private leased line or some other system giving direct access to the LES network, where the required vessel number can be dialled and priority for space segment attached; or
- .3 other suitable arrangements similar to those outlined above.

4 To facilitate contacts between RCCs and LESs, detailed updated information on RCCs has been provided by Inmarsat and is given in the annex.

5 Member Governments are invited to bring this revised circular to the attention of their SAR authorities and RCCs recommending them to establish appropriate arrangements for the use of distress priority communications from shore-to-ship when necessary.

6 Member Governments are also invited to request their RCCs to keep Inmarsat updated with any changes that may occur to their contact details from time to time. The Inmarsat contact e-mail address is: [martime\\_safety@inmarsat.com](mailto:martime_safety@inmarsat.com).

7 This circular revokes COMSAR.1/Circ.50/Rev.2.
