**MRC SEDEF SHIPPING CORPORATION
LIMITED**

**MRC DENIZCILIK TURIZM VE PETROL
URUNLERI TIC. LTD.**

Deficiencies: Code - Category

**15109 - Maintenance of the ship and
equipment**

Description

The company should establish procedures to ensure that the ship is maintained in conformity with the provisions of the relevant rules and regulations and with any additional requirements which may be established by the company. The objective evidence of the deficiencies below brings into question the validity of the safety management system as required in the ISM Code. An audit is required to be submitted to the Coast Guard prior to departure.

06106 - Cargo transfer - Tankers

A tank vessel must have on board an emergency means to stop the flow of oil or hazardous material. Cargo pumps do not shut down when emergency shutdowns are activated from the port and starboard.

06199 - Other (cargo)

The inert gas system shall be capable of delivering inert gas with an oxygen content of not more than 5% by volume. The ship's inert Gas systems' oxygen content meter is inoperable and they are unable to verify an accurate oxygen content.

02199 - Other (Structural condition)

Ships shall be maintained in compliance with the structural requirements of a classification society which is recognized by the administration. Cargo tank port #5 is leaking cargo vapors and inert gas.

**07106 - Fire detection and alarm
system**

The fire detection and alarm system shall be so designed and positioned as to detect rapidly the onset of fire. The smoke detector above the incinerator was found inoperable.

**04114 - Emergency source of power -
Emergency generato**

Means shall be provided to control leaks of flammable liquids. The emergency generators fuel supply line was found leaking.

**04102 - Emergency fire pump and its
pipes**

When the emergency fire pump is delivering water, the pressure shall be not less than 25m³/h. The emergency fire pump has found inoperable.
