Deficiencies: Code - Category

15106 - Shipboard operations

Description

The company should establish procedures to ensure that the ship is maintained in accordance with the provisions of the relevant rules and regulations established by the company. The operational nature of the deficiencies noted below provide objective evidence of a serious failure of the implementing of the ISM Code. An external audit report satisfying to the OCMI must be submitted prior to clearance of this deficiency.

13104 - Bilge pumping arrangements

Bilge wells in periodically unattended machinery spaces shall be located and monitored in such way that the accumulation of liquids is detected at normal angles of trim and heel... PSCO observed that the forwards port and STBD engine room bilge alarms were inoperable since 19DEC24. Additionally, a soft patch was found on a raw water pipe next to the inoperable STBD forward bilge alarm.

13105 - UMS - Ship

Bilge wells in periodically unattended machinery spaces shall be located and monitored in such way that the accumulation of liquids is detected at normal angles of trim and heel... PSCO observed that the level has been operating in an unmanned machinery space status without operable bilge alarms since 19DEC24.
